

The listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A method for providing at least one search result responsive to ~~receiving~~ a search query comprising at least one search query term, the method comprising:  
  
receiving ~~the~~ a search query requesting at least one record in the world wide web;  
processing the search query to produce at least one qualifying record;  
  
transmitting a text representation of ~~each of the qualifying records~~ record for display to a user; and  
  
transmitting a representation of a non-text object ~~in relation with~~ related to the text representation of ~~each the~~ qualifying record ~~that includes an object comprising at least one predetermined attribute for display to the user.~~  
  
2. (Currently Amended) The method of claim 1 wherein ~~each~~ the object comprises an image.  
  
3. (Currently Amended) The method of claim 1 wherein ~~each~~ the record comprises a Web page.  
  
4. (Currently Amended) The method of claim 1 wherein ~~each~~ the object is displayed next to the text representation of ~~the record to which it corresponds.~~

5. (Currently Amended) The method system of claim 1 wherein ~~each~~the object is displayed directly below the text representation ~~of the record to which it corresponds~~.
6. (Currently Amended) The method of claim 1 wherein ~~each~~the object comprises a sound file.
7. (Currently Amended) A method for indexing records in an index of the world wide web ~~an information network~~, the method comprising:
- receiving a record from the world wide web;
  - searching the record for ~~an indication that a non-text object comprising at least one~~ specified attribute is to be displayed with the record finding the indication;
  - creating a representation of the object;
  - storing the representation in association with the record ~~to which it corresponds~~;
- and
- making an entry for the record in the index including the representation, ~~said entry indicating the object to be displayed with the record~~.
8. (Currently Amended) The method of claim 7 wherein ~~each record~~the object comprises an image.
9. (Currently Amended) The method of claim 7 wherein ~~each~~ the record comprises a Web page.

10. (Currently Amended) The method of claim 7 wherein ~~each~~ the object is displayed next to the text representation of ~~the record to which it corresponds~~.

11. (Currently Amended) The method of claim 7 wherein ~~each~~ the object is displayed immediately below the text representation of ~~the record to which it corresponds~~.

12. (Currently Amended) A system for providing at least one search result responsive to ~~receiving~~ a search query comprising at least one search query term, the system comprising:

a query module for receiving the search query, the search query requesting at least one record in the world wide web;

a search module for locating at least one qualifying record ~~containing at least one~~ relating to the search query [term]; and

~~a search result generator~~ transmitter for transmitting a representation of a non-text object ~~in relation with the~~ related to a text representation of each qualifying record ~~that includes the object comprising at least one predetermined attribute for display to the user.~~

13. (Currently Amended) The system of claim 12 wherein ~~each~~ the object comprises an image.

14. (Currently Amended) The system of claim 12 wherein ~~each~~ the record comprises a Web page.

15. (Currently Amended) The ~~method-system~~ of claim 12 wherein ~~each~~ the object is displayed next to the text representation ~~of the record to which it corresponds~~.

16. (Currently Amended) The system of claim 12 wherein ~~each~~ the object is displayed immediately below the text representation ~~of the record to which it corresponds~~.

17. (Currently Amended) The system of claim 12 wherein ~~each~~ the object comprises a hyperlink to a sound file.

18. (Currently Amended) A system for indexing records in an index of an information network, comprising:

~~a Web browser for receiving~~ a database for storing a record from the world wide web;

~~an indexing module for searching the record for a link to an~~ a non-text object comprising at least one specified attribute;

~~a subsystem for finding a non-text object comprising the specified attribute;~~

~~a subsystem for creating a representation of the object;~~

~~a subsystem for storing the representation in association with the record to which it corresponds; and~~

~~a subsystem for making an entry for the record in the index~~ including the representation; ~~said entry indicating the link to the object in the record.~~

19. (Currently Amended) The system of claim 18 wherein ~~each~~ the object comprises an image.

20. (Currently Amended) The system of claim 18 wherein ~~each~~ the record comprises a Web page.

21. (Currently Amended) The system of claim 18 wherein ~~each~~ the object is displayed next to the text representation of ~~the record to which it corresponds~~.

22. (Currently Amended) The system of claim 18 wherein ~~each~~ the object is displayed immediately below the text representation of ~~the record to which it corresponds~~.
